

D) established to contain all of the occupational medical records (both long-term and short-term records) designated for retention, which will be maintained by the employing agency during the employee's Federal service.

Epidemiological Record means a record maintained by an agency or subelement thereof as a result of an official medical research study conducted under the authority of the agency.

Implementing instructions means any form of internal agency issuance that provides the guidance required in § 293.503 and any other guidance the agency deems appropriate.

Occupational Medical Record means an occupation-related, chronological, cumulative record, regardless of the form or process by which it is maintained (e.g., paper document, microfiche, microfilm, or automatic data processing media), of information about health status developed on an employee, including personal and occupational health histories and the opinions and written evaluations generated in the course of diagnosis and/or employment-related treatment/examination by medical health care professionals and technicians. This definition includes the definition of medical records at 29 CFR 1910.20(c)(6); when the term "Occupational Medical Record" is used in these regulations, it includes "Employee Exposure Records" (as that term is defined in this section) and occupational illness, accident, and injury records.

Non-occupational/Patient Record means a record of treatment or examination, created and maintained by a health care facility, when the person is admitted to or voluntarily seeks treatment at the health care facility for non-job-related reasons. Records maintained by an agency dispensary are patient records for the purposes of these regulations except when such records result as a condition of employment or relate to an on-the-job occurrence. In these cases, the records are "Occupational Medical Records" as defined herein.

Non-personal Record means any agency aggregate or statistical record or report resulting from studies covering employees or resulting from studies or the work-site environment.

§ 293.503 Implementing instructions.

Agencies must issue written internal instructions describing how their EMFS is to be implemented. These instructions must—

(a) Describe overall operation of the system within the agency including the designation of the agency official who will be responsible for overall system management. When the agency has a medical officer, that individual must be named the system manager. The system manager may then designate others within the agency to handle the day-to-day management of the records, e.g., the custodian of the records at the site where they are maintained;

(b) Be prepared with joint participation by agency medical, health, and safety, and personnel officers;

(c) Describe where and under whose custody employee occupational medical records will be physically maintained;

(d) Designate which agency office(s) will be responsible for deciding when and what occupational medical records are to be disclosed either to other agency officials or outside the agency;

(e) Ensure proper records retention and security, and preserve confidentiality of doctor/patient relationships;

(f) Provide that when the agency is requesting an EMF from the National Personnel Records Center (NPRC), the request form will show the name, title, and address of that agency's system manager or designee, who is the only official authorized to receive the EMF;

(g) Be consistent with Office regulations relating to personnel actions when medical evidence is a factor (5 CFR parts 339, 432, 630, 752, and 831);

(h) Provide guidance on how an accounting of any record disclosure, as required by the Privacy Act (5 U.S.C. 552a(c)), will be done in a way that ensures that the accounting will be available for the life of the EMF;

(i) When long-term occupational medical records exist, provide for the creation of an EMF for an employee transferring to another agency or leaving Government service, and whether an EMF is to be established at the time an employee is being reassigned within the agency;

(j) Ensure a right of access (consistent with any special Privacy Act

handling procedures invoked) to the records, in whatever format they are maintained, by the employee or a designated representative;

(k) Ensure that a knowledgeable official determines that all appropriate long-term occupational medical records are in an EMF prior to its transfer to another agency, to the NPRC, or to another office within the same employing agency;

(l) Ensure that all long-term occupational medical records an agency receives in an EMF are maintained, whether in that same EMF or by some other agency procedure, and forwarded to a subsequent employing agency or to NPRC;

(m) Ensure that, if occupational medical records are to be physically located in the same office as the Official Personnel Folder (OPF), the records are maintained physically apart from each other;

(n) Sets forth a policy that distinguishes, particularly for purposes of records disclosure, records in the nature of physician treatment records (which are generally not appropriate for disclosure to non-medical officials) from other medical reports properly available to officials making management decisions concerning the employee;

(o) Provide guidance that distinguishes records properly subject to this part from those (e.g., Postal Service or Foreign Service employee medical records) subject to different rules, particularly in Privacy Act and Freedom of Information Act matters;

(p) Ensure that guidance regarding the processing of Privacy Act matters is consistent with Office regulations implementing the Privacy Act at 5 CFR parts 293 and 297; and

(q) Ensure that no security classification is assigned to an EMF by including therein any occupational medical record that has such a classification. In this regard, the agency creating the classified medical record is required to retain it separately from the EMF while placing a notice in the EMF of its existence and describing where requests for this record are to be submitted.

§ 293.504 Composition of, and access to, the Employee Medical File System.

(a) All employee occupational medical records (which exclude employee assistance/counseling, patient, non-personal, and epidemiological records) whether they are maintained in an automated, microform, or paper mode, and wherever located in the agency, are part of the EMFS. The records maintained in the EMFS are part of a Governmentwide Privacy Act system of records established by the Office. Agencies have the responsibility to ensure that such documents are maintained in accordance with the Office's Privacy Act regulations in part 297 of this chapter, with the agency's instructions implementing those regulations, and with the retention schedule for employee medical records stipulated in § 293.511. While non-occupational/patient records pertaining to an employee are not required to be included as a record within the EMFS, under certain conditions to be discussed in subsequent OPM guidance, copies of such records are occupationally-related and, in those cases, may be included in the system.

(b) Agencies must provide employees access to their own EMFS records consistent with Office regulations contained in § 297.204(c) of this chapter. When unexcepted access can be provided directly to the employee, such unexcepted access must also be provided to any representative specifically designated in writing by the employee to receive the record. Disclosure of an employee's occupational medical records to agency officials (both medical and non-medical) will be granted only when the specific information sought is needed for the performance of official duties.

(c) Other agencies for employee occupational medical records made to the custodian of the records must be processed in accordance with the disclosure provisions of the Privacy Act (5 U.S.C. 552a(b)) and the Office's regulations at part 297 of this chapter.

(d) Processing of a Privacy Act request for amendment of any EMFS record must be consistent with the Office's regulations contained in part 297
